A Little Something about Creative Genius...

Once upon a time, there was a boy who was very curious. He liked to explore how things work. He learned many things about the world around him by reading books. But he also really enjoyed working with mechanical objects and chemistry. He liked it so much, in fact, that he began performing experiments at his home. He even ran a telegraph wire to a friend's house, so they could communicate by Morse code!

Eventually, all of the boy's tinkering led him to discoveries and inventions that would one day change the world. Who was this creative genius, you ask? It was Thomas Edison. Just like you, he was very curious about the way things work and enjoyed solving problems through invention. Remember how cool it was to investigate the guts and gadgets of your Take Apart item at the Camp Invention program last summer? Well, that's just the kind of experimenting that got Thomas Edison started on his inventions!

Attention Parents...

This year, in celebration of Edison's creative genius, we are offering the lowest price of the season to our alumni. **Register before Edison's birthday (February 11th) to receive \$35 OFF the base price!** The life skills that your child will acquire through the engaging, hands-on activities of this year's brand new INNOVATE program will affect his or her ability to learn and to work as part of a team for years to come. Here's a sneak peek...

© 2010 Invent Now, Inc.

Power'D™

It's alive! In a secret lab, build your own motorized creature and bring it to life while helping a mysterious scientist harness the power of nature.

Hatched™

The Hatched online community is quickly disappearing. Be a part of the tribe that saves its avatars by rebuilding this desperate virtual world.

SMart: Science, Math & Art™

What do soap bubbles, honeycombs, and lightning bolts all have in common? Explore their surprising connections in the Pattern Kingdom.

Global Games™

Explore soccer and other sports as they were first played in ancient times. Add your own twist, get out of your seats, and get ready to play!

I can Invent III™

Take apart a broken machine and see what's inside. Then use its gears, guts, and gadgets to invent a machine that's never been seen before.
